

ZINZINO

Business Presentation

We want to feel good, stay fit **and be healthy**

The universal desire is to live a vibrant, active life.

Yet **health-related problems** are increasing worldwide.

It's time to ask why.

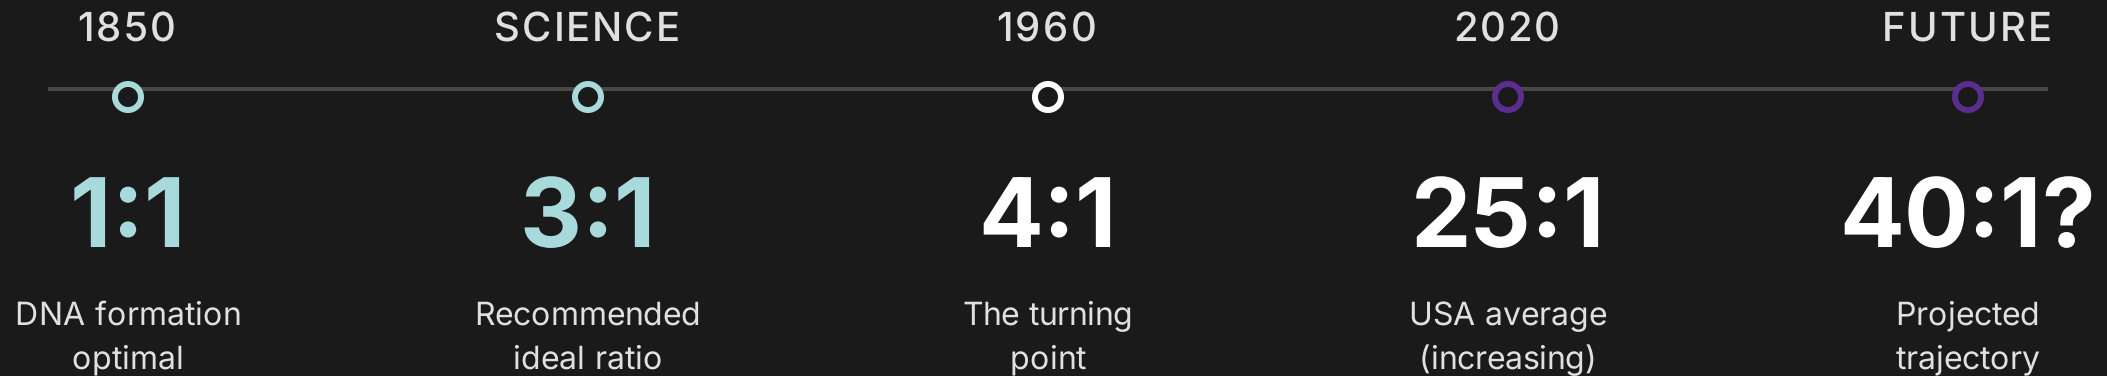

We used to eat from **Mother Nature**.
Today we eat **man-made food**.

Modern diets are low in key nutrients, high in sugar, and critically imbalanced in Omega-6 to Omega-3 fatty acids — essential fats our bodies cannot produce on their own.

"Let your food be your medicine and your medicine be your food."

— HIPPOCRATES, 460–370 BC

The Omega-6:3 ratio has gone from **1:1** to **25:1** — and rising

The Danger Zone

While science recommends a **3:1** ideal ratio for optimal health, the average person today sits at a dangerous **25:1** imbalance. Most people are in the danger zone without realizing it.

Consequences of Imbalance

- Reduced brain and heart function
- Decreased hair quality and skin elasticity
- Reduced inner organ function
- Chronic joint and muscle pain

Our 1.5 million test results reveal **a world out of balance**

97%

GLOBAL AVERAGE

97% South America

98% Asia

99% Africa

Nearly everyone is nutritionally imbalanced — **and most don't know it.**

The **BalanceTest** — Know Your Numbers

Science-based, home-administered, independently analyzed

DISCOVER YOUR PROFILE

- Reads 11 essential fatty acids directly from your blood
- Provides 6 different comprehensive health markers
- Delivers age-appropriate dosage recommendations
- Offers personalized guidelines to restore your Omega-6:3 balance

INDEPENDENT ANALYSIS

All tests are strictly analyzed by **VITAS Analytical Services**, a GMP-certified chemical analysis contract lab.

Official partner to Harvard University, University of Cambridge, University of Oxford, MIT, and the World Health Organization.

MONEY-BACK GUARANTEE

Applies if your first BalanceTest shows an optimal Omega-6:3 balance of 3:1 or better. We believe in test-based nutrition, not guess-based.

95% of people taking Zinzino are back in balance in 120 days
